

Steelhead Report Card Project Map Instructions

1. At <http://bios.dfg.ca.gov/> click on Public **BIOS Data Viewer** button.
2. From the toolbar, click on the **Add BIOS Layers** button. 
3. From **Available Layers** list, select **Steelhead Report Card Projects**, and click on **Add Checked Layers to Map**.
4. On the **Layers** tab, click the check box next to **Steelhead Report Card Projects**.
5. Above the **Layer** tab, click the button called **Click to Refresh Map**. When the map refreshes, you should see colored circles that represent the approximate location in which the project took place.
6. On the toolbar, use the **Zoom**   and **Hand**  tools to find a project location that interests you.
7. On the **Layers** tab, under **BIOS Layers**, click on the title **Steelhead Report Card Projects** in order to make it an **Active Layer**. When it is selected, it will be highlighted in blue.
8. From the toolbar, select the **Identify** tool. 
9. Click on a project point of interest and you will see additional information about the project on the bottom of your window.
